MML SUSPENSION FRAME INSTRUCTIONS

Assembly

Assemble the parts as shown in the diagram below. The plastic clips (Number 5) are cable tidy clips, you can put them anywhere you like or not use them at all.

MML SUSPENSION FRAME INSTRUCTIONS

Please Note Carefully

Please Note

The cable gland is auto locking when feeding the cable in.

If you need to pull the cable back out, loosen the bottom part but be careful not to undo it completely because it has a spring and ball bearings inside.

If you accidentally do this we can't replace that part.
